

# Technology and Methodology Development for Improved Biosecurity in Livestock Transport Vehicles - Phase 2: Preliminary System Development and Data Acquisition

Terry Fonstad, University of Saskatchewan

## Objective

Develop a preliminary vacuum system to clean typical livestock trailers and a preliminary procedure to inactivate pathogens of concern in these trailers.

## Collaborators

Bernardo Predicala, Prairie Swine Centre

Jennifer Brown, Prairie Swine Centre

Volker Gerdts, VIDO-InterVac, University of Saskatchewan

Scott Noble, University of Saskatchewan

Hubert Landry, Prairie Agricultural Machinery Institute

Joy Agnew, Prairie Agricultural Machinery Institute

Bryan Lung, Prairie Agricultural Machinery Institute
