

Swine Innovation Porc

ADVANCING THE CANADIAN SWINE SECTOR THROUGH ENVIRONMENTAL FOOTPRINT ANALYSES

Mario Tenuta, University of Manitoba

Objective(s):

- 1) Establish current production efficiency and environmental footprint of pig farming in Canada.
- 2) Determine changes in production practices over the past 10-12 years.
- 3) Identify improvements in the environmental footprint of pig farming in Canada, through a comparison of current pig farming in Canada to an earlier period.

Collaborators:

Shabtai Bittman	Agassiz Research and Development Centre, AAFC
Derek Brewin	University of Manitoba
Laurie Connor	University of Manitoba
Martin Entz	University of Manitoba
Bernard Goyette	Sherbrooke Research and Development Centre, AAFC
Roland Kroebe	Lethbridge Research and Development Centre, AAFC
Shannan Little	Lethbridge Research and Development Centre, AAFC
Martin Nyachoti	University of Manitoba
Candido Pomar	Sherbrooke Research and Development Centre, AAFC
Christine Rawluk	University of Manitoba
Qiang Zhang	University of Manitoba

Project status:

Currently in progress. Results expected in 2022.

Financial support for this project

This project is part of the Swine Cluster 3 (2018-2023) research program, made possible through financial support from Agriculture and Agri-Food Canada's Canadian Agricultural Partnership, eight provincial pork producer organizations and over 30 industry partners.
